

Highway 101

Highway 101/I-580 Greenbrae Corridor Improvement Project Open House and Public Workshop Notice

March 2007

PUBLIC WORKSHOP SCHEDULED

**Join us on Tuesday, March 27th
for a Public Workshop on the Greenbrae
Corridor Project.**

ENGAGING THE COMMUNITY & INTERESTED STAKEHOLDERS

The Transportation Authority of Marin (TAM) will host the second in a series of workshops to engage the community in developing context sensitive solutions that meet their vision for the Greenbrae Corridor and adjacent streets while providing safe and efficient travel for all modes of transportation.

Public Workshop Scheduled *

Tuesday, March 27, 2007, 6:00 P.M. to 9:00 P.M.

Open House 6:00 – 6:30 P.M.

Presentation 6:30 – 7:00 P.M.

Open House/Feedback Session 7:00 – 9:00 P.M.

**Redwood High School (Cafeteria)
395 Doherty Dr., Larkspur, CA**

* If you need special meeting accommodations, please see back for details

The purpose of this workshop is to:

- Review preliminary improvement options addressing issues identified by the community
- Present the latest information on traffic studies, the Tamalpais Interchange Planning Study and status of the Central Marin Ferry Connection
- Present the project study process, schedule and milestones

Please come early to attend the open house, review project information on display, and talk to project team members about potential improvement options. A brief presentation will follow the open house that includes details on the latest project information. The open house will resume following the presentation, and participants will have an opportunity to:

- Review options and how they will address key issues
- Discuss options with project team members
- Provide detailed feedback on options under consideration

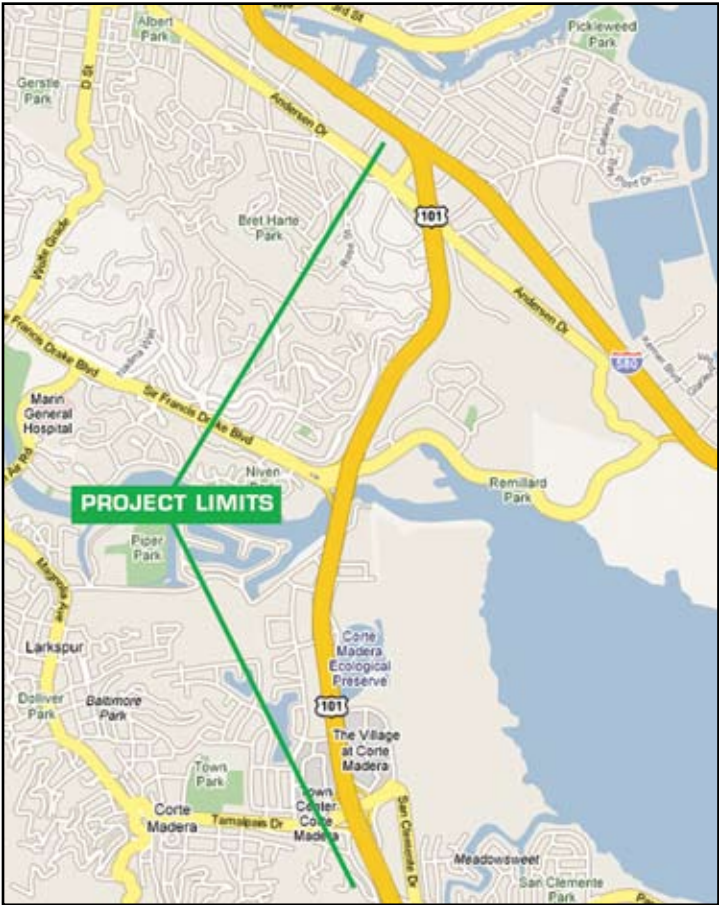

Last fall, public comments were gathered from stakeholder interviews and the first public workshop to create a comprehensive list of issues to be addressed by potential improvement options. Since then, additional engineering and traffic studies have been conducted to help identify advantages and disadvantages of potential options.

PROJECT BACKGROUND

TAM is conducting a data-driven analysis process with active community involvement to develop multi-modal improvements on Highway 101 between the Tamalpais Drive and I-580 interchanges that will address congestion and improve safety and mobility. The corridor is designated as the 8th worst congested highway in the Bay Area – and future traffic growth will make it worse. Some of the existing corridor inadequacies include:

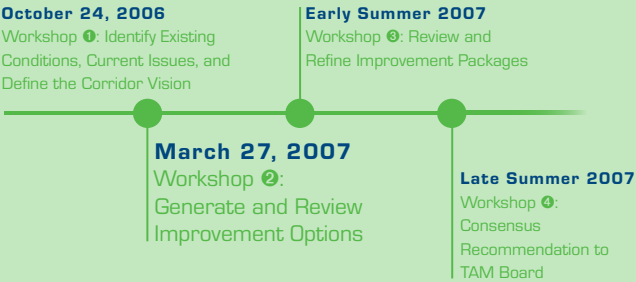

- Closely-spaced interchanges on Highway 101 that do not meet current California Department of Transportation (Caltrans) standards and cause weaving and merging conflicts on the highway,
- Higher accident rates than the average for a similar roadway because of overlapping weaving and merging areas,
- Congested local streets in Corte Madera, Larkspur and San Rafael because of limited local circulation routes and diversions from the congested highway, and
- Limited transit and pedestrian/bicycle facilities that decrease mobility and increase congestion within the corridor.

OPEN HOUSE AND PUBLIC WORKSHOP NOTICE: Highway 101/I-580 Greenbrae Corridor Improvement Project
The Transportation Authority of Marin (TAM) has developed potential improvement options and needs your input!

PROJECT SCHEDULE

The following schedule captures the major milestones related to our consensus building activities.

FOR MORE INFORMATION

Please check the web site at www.tam.ca.gov for the most current project information and to submit project comments. Under **Contact Us**, you may submit comments using the Comments Feedback link — please include Greenbrae in the subject line. If you have any additional questions about the project please contact Bill Whitney at **(415) 507-2810** or email at **BWhitney@co.marin.ca.us**.

* Meeting facilities are accessible to persons with disabilities. Requests for special accommodations should be directed to Denise Merleno, (415) 507-2680 or email: dmerleno@tam.ca.gov no later than 5 days before the meeting date.

See inside for information about an upcoming public workshop on March 27
